

Feature	Richta	MiRally
Response to passing a timing checkpoint	Score at each checkpoint is displayed to competitor immediately after each checkpoint. There is an option to have voice announcement of the score.	No response to passing a checkpoint. No score displayed, no audible signal that a checkpoint has been passed.
Display of your score	Your score is shown on your phone/tablet immediately after each checkpoint.	You only see your scores at breaks/finish on rallymaster's laptop.
Display of other competitor's scores	Richta Scoreboard app makes all scores available to all competitors in real time.	Scores are displayed on rallymaster's laptop at breaks/finish.
Time allowances (T/A)	T/A's are entered by pressing a button on competitor's phone's screen. T/A must be entered before checkpoint at which it is to be applied. T/A is applied to subsequent checkpoints if appropriate.	No provision for T/A's. Workaround is for contestants to submit a paper request for T/A at the next break. Request specifies the mileage at which to apply the T/A. Rallymaster manually adjusts scores to apply T/A.
